EXPANDER REPAIR

An efficient alternative

NEW PURCHASE VS REPAIR

The availability of plant and equipment has become one of the most important success factors vis-à-vis the competition. Components need to be ready for use as quickly as possible and the variant chosen needs to be as economical as possible. So do you buy a new one or repair the existing one? Something certainly worth thinking about!

The purchase of a new expander is linked to longer delivery times. The threat of failure of these high-precision parts can result in serious problems. The alternative is to repair it. After all, it is not the cost benefit which is the deciding factor, rather it is the quick availability of the machine.

The first step is to analyse the damage using the documentation, in order to be able to take effective measures towards solving the problem.

If a detailed local damage analysis is necessary, we will send out our experts. Thanks to our worldwide Service network, our specialists can always get to you quickly.

Once the scope of the repair has been determined, the expander can then be transported to us.

Our modern workshop in Mönchengladbach offers ideal technical conditions for fulfilling individual repair contracts quickly and on time, using the highest-quality products.

What's more, our employees have extensive experience, particularly in the effective signal analysis and diagnosis of damage patterns. The structured course of action and documentation of the cause of the damage can also serve to highlight potential for improvement to the customer.

WHAT WE OFFER

- Damage analysis, on-site if required
- Definition of the scope of the repair
- Detailed analysis and disassembly at SMS Meer
- Repair of the expander
- Creation of inspection reports

HOW YOU BENEFIT

- Expander repaired by the original manufacturer
- Shorter delivery times compared to a new purchase
- Longer service life
- Savings on resources
- Cost savings compared to newly manufactured equipment
- Warranty on repairs carried out
- Documentation of work carried out

Save yourself time and money and go for a repair!

Any requests or queries?
