ERECTION & COMMISSIONING

Get off to a successful start

PROFESSIONAL SUPPORT

It is not at the start of production when you find out if you have chosen the best plant engineering company and service partner. Already at the erection stage the plant and machinery must be assembled to quality standards and in the shortest possible time. Careful commissioning afterwards is just as important as reacting flexibly to changes in customers' requirements.

Our SMS Meer Service Experts are experienced in carrying out erection and commissioning work world-wide. All plants are professionally erected and optimally tailored to the production processes. In addition to the installation of mechanical, hydraulic and electrical components, extensive performance tests are also carried out. These serve to check the operating parameters and guarantee a continuously high level of machine production quality. Thanks to many years of experience and manufacturing know-how, our specialists are able to adapt individually to changes in customers' requirements even during erection of the facilities.

Following commissioning of the plants, the operating personnel receive on-site training in the new technology as well as instruction in the operation of the plants. Comprehensive documentation including operating and maintenance instructions is compiled. The careful execution of the final acceptance of the plant is also included in our range of services.

Furthermore, we will assist you with the start-up of production and support you in maintaining safe and reliable production.

Play it safe and rely on the erection and commissioning expertise of SMS Meer Service!

THE SERVICE WE OFFER

- Professional site management and commissioning
- Monitoring and execution of the mechanical, hydraulic and electronic installation
- Performance tests for checking the operating parameters and safeguarding product quality
- Detailed instruction of plant personnel
- Careful final acceptance
- Production start-up assistance

HOW YOU BENEFIT

- Smooth implementation of erection and commissioning
- High degree of reliability with time planning and schedules
- Manufacturer's warranty covering operational reliability of the entire plant
- Optimal production start-up conditions for your plant

Any requests or queries?

We look forward to hearing from you!
