UTILISING PERFORMANCE POTENTIAL

SMS Meer facilities consist of high-quality components which are known for their longevity and reliability. Yet even with the most reliable machines the levels of productivity and product quality can drop. Whether it be damage or defects caused by wear parts, the result in the worst case scenario could be a machine stoppage.

In such cases, repairs need to be carried out as quickly as possible in order to restore the machines to full working order. Our Repair service is always on hand to help you with any problem! Thanks to many years of experience and our manufacturer's know-how, we are able to offer you the best advice as well as repair your machinery within a very short time.

ALL SERVICES FROM JUST ONE SOURCE

The SMS Meer Service experts complete a survey of the damage and have the affected components, depending on the damage, repaired directly on-site or in our workshop. Damaged as well as worn parts are removed and repaired or replaced with new components. A comprehensive functional test is then carried out after the repair. Only when the original functional scope of the machine has been restored is it handed over to the customer.

In addition to the repairs, we naturally support you in all further process stages, too. From dismantling through erection and commissioning to production support – our Service experts are there for you at all times.

You can trust our expertise when it comes to repairs, so get in touch if you're faced with damage!

OUR SERVICE

- Detailed damage analysis
- Immediate repair on-site or in our workshop
- Dismantling and transportation
- Dimensional/crack/wear testing
- Replacement and repair of damaged or defective components
- Functional test
- Re-assembly, commissioning and production support

HOW YOU BENEFIT

- Quick reaction times
- Comprehensive repairs with manufacturer's know-how
- Restoration of the machine's availability
- Longer service life of the equipment
- Long-lasting, original spare parts

Any requests or queries?

We look forward to hearing from you!
